

oh-my-posh

记录两个文件夹的位置

- 配置文件地址： D:\Documents\WindowsPowerShell

- theme 地址： C:\Users\yuehu\AppData\Local\Programs\oh-my-posh\themes

📁 > yh chen > AppData > Local > Programs > oh-my-posh > themes

• 效果图

• 记录下配置文件内容

```
Import-Module oh-my-posh
```

```
oh-my-posh init pwsh --config "C:\Users\yuehu\AppData\Local\Programs\oh-my-posh\themes\yhchen.omp.json" | Invoke-Expression
```

```
Import-Module -Name Terminal-Icons
```

A screenshot of a PowerShell profile script file named 'Microsoft.PowerShell_profile.ps1'. The script contains four lines of code: 1. 'Import-Module oh-my-posh', 2. 'oh-my-posh init pwsh --config "C:\Users\yuehu\AppData\Local\Programs\oh-my-posh\themes\yhchen.omp.json" | Invoke-Expression', and 3. 'Import-Module -Name Terminal-Icons'. The file is opened in a dark-themed editor with a tab at the top.

- 同样记录下yhchen.omp.json文件的详细内容

我在 bubblesextra.omp.json 基础上进行 **时间块** 的增加，详细内容如下：

```
1      {
2          "background": "#29315A",
3          "foreground": "#cd28cd",
4          "leading_diamond": " \ue0b6",
5          "properties": {
6              "time_format": "15:04:05"
7          },
8          "style": "diamond",
9          "template": " {{ .CurrentDate | date .Format }} ",
10         "trailing_diamond": "\ue0b4",
11         "type": "time"
12     },
```

(下图红框表示的是插入的位置)

```
